

**ADAPTIVE TECHNOLOGY
ENGINEERING NETWORK**

We strive to help those with disabilities with adaptive technology. Currently, we are working on our LEAFS program that is held annually during winter term. We also work on a variety of other projects. If you have a project involving engineering and accessibility, please reach out!

**LEADING AND ENABELING
ADOLESCENCES FUTURES
IN STEM**

The goal of LEAFS is to help inspire youths with disabilities to find their passion by interacting with several STEM based activities. We aim to promote a more inclusive environment and develop diversity in thought for future engineers, as they tackle tomorrow's most challenging technological problems.
